

## ENVNCTIATVM DECIMVM TERTI,

Veneris locum in **Zodiaco** promptissimè absq; omni numerorum ratione, & quasi opere nullo, pernoscere.

flum flatur. Nam si ante Christum lit, centenario maiori conueniens, radix epicuri, accepta referatur, anni residui vltra centenario elapsi, prima tabularum ordine excipiantur, minuta, & secunda ibidem adserta adimere vel addere, pro vltima M vel A exigit, oportebit Radix anni prædictis sic omnino quadrabit. Eadem ergo radix in Zodiaco cognita, cum offensore M fietur, Dies, hora & minuta quantum possibile est, postmodum in limbo M rotæ cum litæ exprella, offensore M subfirmato flabulantur. Augmen Veneris, quæ perpetuè ad Sole eadem est, p index vbi reuerit, coitus crucis GH I & indicis M notabitur, huic loco aduersus in circulo KLM punctus, per quæ deducto æquansilio, & epiculi centrum & crux 4 subordinantur, & sic inferiorem epiculum firmaveris. Radicem Argumenti Veneris tertia numerorum columna, sicut medium motum ante solutes, venaberis, super quod Argumentum indicem Y loca. Annos quoque residuos in limbo superioris epiculi requies, requisitis limbo intendens, intendo indicem Y rursus fudeces. Dies, horas, minuta deinde in Kalendario eiusdem orbiculi limbo exprimes, offensorem superpositum accipiat. Quo facto vniuersam instrumenti machinam solidaueris. Filium A nunc per epiculi stellam lit emittis verum Veneris locum in Zodiaco discies
